San Diego County Office of Education Reaches a Tremendous Milestone with GENESIS™ Deployment

11/5/10 – Irvine, CA – Edupoint™ Educational Systems, a leading provider of student information systems (SIS) to the national K-12 market, announced today that one of its largest partners, the San Diego County Office of Education (SDCOE), under the leadership of its Assistant Superintendent and CTO Stephen R. Clemons, has reached a milestone in its GENESIS implementation. In less than 18 months, SDCOE has successfully migrated 61 school districts and charter schools serving over 100,000 students in three southern California counties (San Diego, Imperial and Orange County) to Edupoint's GENESIS student information system. The success of this program is attributed to the true collaboration and partnership between SDCOE, its consortium districts, and Edupoint.

SDCOE and Edupoint are currently planning the addition of new modules to provide curriculum management, assessment and business intelligence reporting capabilities to consortium members. California districts and charter schools interested in learning more about the SDCOE student information system consortium services should contact Fay Lawson, Student Information Systems Manager at the San Diego County Office of Education, at flawson@sdcoe.net.

About Edupoint Educational Systems

For thirty years, the leadership of Edupoint Educational Systems, LLC, has set the standard for K-12 student information management systems. Their innovative solutions have been used by thousands of schools to manage millions of students. Today, the company empowers a new era of self-sufficient school districts with solutions built on Revelation Technology™, its extensible, scalable, rapid application development platform. Those solutions include GENESIS™, an enterprise-level student information system, and GENESEA™, a comprehensive special education management system.
