

FOR IMMEDIATE RELEASE

EDUPOINT MIGRATES VIRGINIA BEACH CITY PUBLIC SCHOOLS TO GENESIS™

SASl student information system replaced to meet Virginia compliance requirements

MESA, ARIZONA – (August 1, 2009) – Edupoint Educational Systems, a student information system solutions provider to the national K-12 market, has been selected by the Virginia Beach City Public School District to implement a student information system (SIS) across 85 campuses that will support more than 80,000 students and full-time staff members. The company's GENESIS™ SIS solution delivers comprehensive student management functionality that streamlines record keeping, engages parents in their child's education, and meets every state and federal reporting requirement.

Bob Weathers, Edupoint Founder and Chairman, announced the award: "Our selection represents further confirmation that school districts seek a SIS partner, and not just a software vendor. Certainly, GENESIS™ is the leading SIS solution, and its robust features met every functional requirement of the Virginia Beach RFP. However, the school district wanted a customized solution, one that included professional services and specific features as it moved from the SASl environment to one that was compliant with all state reporting regulations. Edupoint will be committing the resources to collaborate with Virginia Beach PSD to meet every project goal."

The district's confidence in Edupoint to deliver a seamless transition from an early SIS system, SASlxp, is well warranted – in a previous venture, Weathers founded the company that developed that software, and Edupoint has helped other SASl customers migrate to GENESIS™. Edupoint will also implement its State Reporting module to enable the district to meet the unique requirements of the Virginia State Board of Education.

Edupoint will be providing professional services to customize and implement GENESIS™, and training services to ensure rapid user adoption of the new system. Virginia Beach City PSD plans a phased launch of the GENESIS™ solution beginning in January of 2010.

About Edupoint Educational Systems:

Edupoint Educational Systems, with locations in Laguna Hills, California, and Mesa, Arizona, has provided administrative support products for K-12 schools since 1998. Its industry-leading solution offering includes GENESIS™, a centralized web-based student information system, and GENESEA™, a centralized web-based special education management system. The company's solutions reside on its Revelation Technology™ rapid application development platform, which allows school districts to quickly develop customized extensions to Edupoint's core products.
