Yuma Consortium Offers Edupoint™ Solution to Area School Districts

The Regional Technology Consortium Will Implement and Host Edupoint's GENESIS™ SIS Solution Suite as a Shared Software Service to Member School Districts

MESA, ARIZONA – (February 25, 2011) – Another regional technology consortium for public schools has selected Edupoint Educational Systems, a student information system (SIS) solutions provider to the national K-12 market, to implement its GENESIS SIS solution for use by its member school districts. Yuma Education Technology Consortium (YETC), serves school districts in the region surrounding Yuma, Arizona, and will offer the comprehensive GENESIS solution suite, including the TeacherVue™, ParentVue™ and StudentVue™, to members as a shared software service.

The YETC has an aggressive timeline to go live by July 2011 as their previous solution, eSIS®, has been acquired by another vendor. Edupoint has stepped forward with an expedited implementation plan that will allow YETC to launch GENESIS over the summer.

Edupoint's experience was a critical factor in its selection according to Robin Krizay, Operations Manager at the YETC. "Our Consortium districts wanted to expedite the process of choosing a new SIS after receiving the eSIS end-of-life notice. Edupoint and GENESIS were chosen because they are a proven solution for Arizona's compliance reporting requirements with numerous customers in the state. The solution is as robust as any we evaluated and allows us to provide each of our customers with a unique system that meets their specific needs."

"It's been exciting to see our success with technology consortiums. The flexible, yet powerful, GENESIS solution suite is a strong value proposition for consortiums trying to satisfy and support diverse requirements," said Richard Lessard, Edupoint's Vice President of Sales, as he announced the agreement. "Yuma's selection of Edupoint in a competitive bid of national providers confirms the strength of our solution for eSIS

customers. We recognize that eSIS districts want the best solution on the market and won't settle for less. Together with our other consortium partners we welcome the Yuma ETC to the Edupoint family.”

Yuma ETC joins other consortiums serving areas in Minnesota, California and Arizona that have selected GENESIS in the last few years. Edupoint has begun implementation work with the Yuma ETC and expects to be completed in July of 2011.

About Edupoint Educational Systems

For thirty years, the leadership of Edupoint Educational Systems, LLC, has set the standard for K-12 student information management systems. Their innovative solutions have been used by thousands of schools to manage millions of students. Today, the company empowers a new era of self-sufficient school districts with solutions built on Revelation Technology™, its extensible, scalable, rapid application development platform. Those solutions include GENESIS™, an enterprise-level student information system, and GENESEA™, a comprehensive special education management system.
